Cairo, Egypt

Summary

Mid-level Flutter Developer with 4+ years of mobile development experience and **10+ Android and iOS apps** published on Google Play and the App Store, across SaaS, ERP, LMS, logistics and gaming. Improved app performance by **60%** at Weevo and migrated two production apps from **Flutter 2.10 to Flutter 3.x**. Strong in Dart, Clean Architecture, BLoC, Firebase, REST APIs, payments, in-app purchases and CI/CD. Former ITI Flutter Instructor.

Skills

Languages and frameworks: Dart, Flutter

State Management: BLoC, Cubit, Provider, GetX, Riverpod

Architecture: Clean Architecture, MVVM, SOLID, Design Patterns, Dependency Injection (GetIt), Modular Architecture, System Design

Networking: REST APIs, Dio, Retrofit, HTTP, OAuth, JSON Serialization (json_serializable)

Firebase: Cloud Firestore, Firebase Cloud Messaging (FCM), Push Notifications, Remote Config, Analytics

Storage: SQLite, Hive, Shared Preferences, Offline-First

Monetization and payments: In-App Purchases (IAP), Ads (Unity LevelPlay), Payment Gateway Integration

Localization: Arabic and English, RTL layouts

Testing and quality: Unit Testing, Widget Testing, Debugging, Code Review, Performance Optimization, Flutter SDK Migration

Tools and DevOps: Git, GitHub, CI/CD, Flutter Flavors, Jira, Google Play Console, App Store Connect, Google Maps

Experience

Flutter Developer (Part-time), 03/2026 – Present
Geeks Tech | Remote (Amman, Jordan)

- Build and ship Arabic party and word games in Flutter for Android and iOS, including one with **100K+ downloads** and another with **10K+**.
- Contribute to a shared Flutter game kit package used across all studio apps for ads (Unity LevelPlay), in-app purchases, Firebase and review prompts.
- Implement offline-first gameplay, RTL Arabic UI and monetization flows.
- Ship releases through Google Play Console and App Store Connect, working from Jira tickets with QA.

Mobile Software Engineer (Flutter), Solvytix | Cairo, Egypt 01/2025 – present

- Develop and maintain 11 production Flutter apps for Android and iOS across LMS, ERP/HR, AI agent governance, maintenance, school canteen and study-abroad domains.
- Own features end to end, from architecture and API integration to store release, using Clean Architecture, BLoC/Cubit and REST APIs.
- Integrate payment gateways, push notifications (FCM) and Arabic/English localization.
- Publish and maintain all apps on Google Play and the App Store.

Mobile Software Engineer (Flutter, Part-time), 07/2024 – present
Weevo | Remote (Giza, Egypt)

- Develop and maintain 3 delivery apps (Merchant, Captain, Customer) for Android and iOS.

- Improved app performance by **60%**, cutting startup time and UI jank, and resolved all reported production crashes through code optimization and refactoring.
- Migrated 2 production apps from Flutter 2.10 to Flutter 3.x, refactoring most features for maintainability and scalability.
- Set up automated testing and CI/CD for builds and store releases.

Flutter Instructor, 07/2025 – 11/2025
Information Technology Institute (ITI) | Cairo, Egypt
- Taught Dart, state management, REST APIs, Firebase and Clean Architecture to Flutter trainees.
- Mentored trainees through practical projects, code reviews and debugging.

Android and Flutter Developer, 01/2021 – 01/2023
Mahatech Academy | Cairo, Egypt
- Built and released Android Native and Flutter apps from planning to Google Play publishing.
- Delivered responsive UI, REST API integration, local storage, testing and release support.

Projects

ElKanteen – School Canteen Management Platform, Solvytix | Flutter, BLoC/Cubit, REST APIs, FCM
- Led end-to-end development of 3 Flutter apps (Parent, Student, Cashier POS), owning planning, architecture, implementation and API integration.
- Built the cashier POS: QR and student-code lookup, product sales, wallet payments, pre-order processing, item-level refunds and transaction management.
- Delivered parent and student features: menu browsing, pre-orders, child profiles, wallet management and push notifications.

Weevo Merchant and Weevo Captain – Delivery Apps, Weevo | Flutter, Firebase, REST APIs
- Egypt's first real-time delivery platform for prepaid orders and insured personal shipments, connecting merchants with captains for local and inter-governorate deliveries.
- Built real-time order synchronization, authentication and payment integration; published on Google Play and the App Store.

Gatelion – AI Agent Approval App, Solvytix | Flutter, Biometric Authentication, FCM
- Built an app for approving or rejecting AI agent actions (payments, record changes) from push notifications, with a full audit trail.
- Implemented biometric approvals signed on device, QR device linking and screenshot blocking.

CEB Platform – LMS and HR Apps, Solvytix | Flutter, BLoC, REST APIs
- Built 2 apps: learning management (courses, training sessions, QR attendance, assignments, quizzes, progress tracking, certificates) and HR (attendance, leave, approval workflows, performance reviews, role-based access).

Cognitech Platform – LMS and Enterprise Apps, Solvytix | Flutter, BLoC, REST APIs
- Built 2 apps: learning management (enrollment, video lessons, live sessions, quizzes, certificates) and enterprise operations (attendance, leave, payroll, approvals) with secure multi-tenant access and Arabic/English support.

Barra Al-Salfeh – Social Deduction Party Game, Geeks Tech | Flutter, IAP, Unity LevelPlay
- Arabic/English party game with category rounds, secret words, questioning, bluffing and player voting; **100K+ downloads** with ads and in-app purchases.

Guess It – Charades Party Game, Geeks Tech | Flutter, IAP, Unity LevelPlay
- Team-based charades and word-guessing game with themed categories, timed rounds, scoring and passing; **10K+ downloads** with ads and in-app purchases.

Sawaleef – Multi-Game Party App, Geeks Tech | Flutter, IAP
- Arabic party app combining spy, charades, truth-or-dare and quiz modes, with category unlocks through in-app purchases.

Clash Kalimat – Arabic Word Puzzle, Geeks Tech | Flutter
- Word-puzzle game with image clues, letter challenges and progressive levels.

LineSteel and LineSteel Technician – Maintenance Apps, Solvytix | Flutter, REST APIs
- Customer app for maintenance requests, tracking, payments and support chat, plus a technician app for job management and status updates.

Boost Abroad – Study-Abroad App, Solvytix | Flutter, REST APIs
- Program discovery and application tracking for students applying abroad.

Education

Bachelor of Science in Statistics and Computer Science, Cairo, Egypt | 05/2023
Helwan University

Information Technology Institute (ITI) 11/2023 – 03/2024

- Intensive Training Diploma, Ministry of Communications and Information Technology (MCIT), Frontend and Cross Platform Mobile Development.
